

NEWS RELEASE

EnGro's range of Green Label products widens to nine products

ECO-FRIENDLY BUILDING MATERIAL WITH LOW CARBON FOOTPRINT

EnGro's range of cost-effective Green Label certified building materials with low carbon footprint makes buildings greener by reducing the embodied CO₂ and preserve the natural resources so that our future generations will not be deprived of the treasures we have today.

CGBS	BLENDED CEMENT		
	P4246 P4246S P197A P197B		
CONCRETE	DRY MIX POWDER	ULTRA-FINE SLAG POWDER	
DuraCrete	PRIME MIX PRIME SCREED	P8000	

(GreenLabel ID no: 022-003)
(GreenLabel ID no: 022-009)

19 October 2009 – The Singapore Environment Council (SEC) recently granted approval to two of EnGro's dry-mix powder materials currently marketed under the S3 brand:

Product	Description
Prime-Mix	Pre-packed cement-sand plaster with fly-ash replacing 20% of cement content
Prime Screed	Dry mixed floor screed with fly ash replacing 20% of cement

In order to comply with the new standard *SS EN 197- 1: 2008*, our P146 brand of Portland-Slag Cement is now separated into two products, namely, P197A and P197B as follows:

Product	Specification (SS EN 197-1: 2008)
P197A	Portland-Slag Cement CEM II/A-S 42,5N
P197B	Portland Slag Cement CEM II/B-S 42,5N

We are glad that more of our products received the Green Label status as recognition of our efforts to provide truly low carbon Green Label certified solutions for our customers as we build durability with the environment in mind.

NOTES

About EnGro Corporation Limited

EnGro has established itself as a leading specialty cement producer in Singapore. Since 2005, the Group has strengthened the supply-chain by leveraging on its GGBS joint venture production base in China coupled with its Pulau Damar Laut bulk-terminal cum logistics services undertaken by Top-Mix ready-mix concrete operations. The extended supply chain allows EnGro to meet stringent requirement for specialty cement and high performance concrete supply. With this integration, EnGro is able to undertake supply of voluminous quantity timely to prestigious mega projects. As the first local cement company granted the Singapore Green Label for its eco-friendly VCEM brand of GGBS products, EnGro is well-positioned to contribute to the growing green building needs of the regional construction industry. EnGro has built 2 core businesses, namely the specialty cement and the specialty polymer. Operationally, it is driven by these 2 growth engines supplemented by evergreen venture capital (VC) investment activity in technology-driven businesses.

About Singapore Environment Council

Established in 1995, the Singapore Environment Council (SEC) is the umbrella organisation for green groups in Singapore. The Council champions activities and needs of all who are concerned about protecting the environment. SEC's core activities include publicising key green issues, co-ordinating national projects and leading island-wide response to major environmental challenges. Over the years, SEC has given strength and bearing to the environmental movement here. The Council is an independently managed, non-government, non-profit organisation, with the status of an institution of public character. Further details are available from www.sec.org.sg
